

FreightW is a secure online ERP system for companies involved in the business of freight forwarding, packaging, customs clearing and transport & logistics (3pl). It was developed in 2015-2016 in consultation with two well established freight forwarding companies and formally launched in July 2016. This secure cloud based hosted solution comes with premium hosting, SSL for web security, support & maintenance and free features upgrades as & when available.

Our customers in Lahore, Karachi and Dubai are now making great business decisions using FreightW ERP everyday as well as enjoying increased profitability and recoveries.

# Integrated Modules

## CRM SYSTEM

Manage your Customers, Vendors and Agents all in one place. Manage their contacts with a primary contact person for attention in Quotes, Job cards and Invoices and for all your freight forwarding documents. Never loose a contact again, ever!

## FREIGHT FORWARDING OPERATIONS

Need to send Quotes to existing or new clients? Start with Quotes management and post Jobs and Invoices upon approval of Jobs. So much ease with appropriate flow of information. You won't have to add same data multiple times. Manage Airway Bills, Arrival & Delivery Notices and much more.

## ACCOUNTS MANAGEMENT SYSTEM

Let your accounts department do what they're supposed to do: COLLECT MONEY! more and more. With one-click operation mark the Job as complete and automatically post relevant vouchers in an integrated accounting system. Keep an eye on gross monthly profits with comprehensive reports.
